RIB Reģionālā Investīciju Banka

Connecting and integrating the RIB Payment Gateway solution

Dear customer!

Thank you for choosing to use AS "Reģionālā investīciju banka" ('RIB') Payment Gateway solution.
To start the connection and integration of your system into the RIB system, please take the following steps.

1 — Generation of certificates and submission of requests

1. Read the RIB Payment Gateway API Specification.
2. In accordance with the specification, generate:

   - ✓ a Transport Public Certificate Request (CSR)
   - ✓ a Signing Public Certificate for each user individually

3. Using the RIB Internet Banking system, section "Applications" > "Free form applications", send us the generated certificates and requests changed from ".csr" to ".txt" extension as attachments.

2 — Your company's IP address

In your application, specify your company's external IP address, from which you are planning to connect to the RIB Payment Gateway solution.

3 — Receiving data from RIB

After receiving your data, RIB will:

- ✓ prepare and send you the Transport Authentication Certificate;
- ✓ send all your users messages via the RIB Internet Banking system, containing Payment Gateway identifiers and the API key.

4 — Integrating certificates and identifiers

After receiving certificates, identifiers and the API Key, integrate them into your system to ensure connection to the RIB Payment Gateway system and start its use.

Should you have any questions or require assistance with the actions above,
please contact your customer manager or
our Customer Service Centre
by calling at **+371 67 359 000** or by writing a message via the RIB Internet Banking.

Thank you for Your trust.
